Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,4,6,8,19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Garyantes et al. (US 2001/0036195).

4. Garyantes discloses a CDMA demodulator comprising a memory for storing samples according to memory address; a finger timing unit for producing a timing reference; a register for storing the memory address and a sample processor for processing samples .The finger timing unit comprises a plurality of counters. (See fig. 1 abstract and col. 2, paragraphs {0019-0026} and col.4 paragraph {0046})

Allowable Subject Matter

Art Unit: 2637

5. Claims 2-3,5,7,9-18,22-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to anticipate or render obvious the claimed CDMA demodulator comprising a particular limitations of claims 1 and 20 in combination with a digital signal processing for symbol demodulating and combining the processed symbols corresponding to the plurality of fingers and the particular limitation of claims 4,19 and 21 in combination with the particular limitation of claims 5,7,9-18 and 22-26.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohsuge (US 2001/0028676) is cited to show a finger-timing unit controlling a plurality of rake fingers.
